Table of contents

No. 1 1–210 issued on July 1, 1986
No. 2 211–436 issued on July 15, 1986
No. 3 437–668 issued on August 1, 1986

Review

The nicotinic acetylcholine receptor and its ion channel
F. Hucho 211–226

Corrections 667

Nucleic acids, protein synthesis, and molecular genetics

Upstream sequences modulate *in vitro* transcription from *Drosophila* yolk protein genes I and II
D. Voss and O. Pongs 25– 32

Tissue-specific heterogeneity of the 3′-untranslated region of L-type pyruvate kinase mRNAs
J. Marie, M.-P. Simon, Y.-C. Lone, M. Cognet and A. Kahn 33– 41

Biochemical comparison of the *Neurospora crassa* wild type and the temperature-sensitive and leucine-auxotroph mutant *leu-5* – Purification of the cytoplasmic and mitochondrial leucyl-tRNA synthetases and comparison of the enzymatic activities and the degradation patterns
S. Kunugi, Y. Uehara-Kunugi, F. von der Haar, J. Schischkoff, W. Freist, U. Englisch and F. Cramer 43– 49

Structure and expression of ubiquitin genes in higher plants
K. Gausing and R. Barkardottir 57– 62

Biosynthesis of rat-liver pI-5.0 esterases in cell-free systems and in cultured hepatocytes
M. Robbi and H. Beaufay 187–194

Effect of polyamines on *in vitro* reconstitution of ribosomal subunits
T. Kakegawa, S. Hirose, K. Kashiwagi and K. Igarashi 265–269

Searching for autolysin functions – Characterization of a pneumococcal mutant deleted in the *lytA* gene
J. M. Sanchez-Puelles, C. Ronda, J. L. Garcia, P. Garcia, R. Lopez and E. Garcia 289–293

Detection and partial characterization of the chromatin-associated proteases of yeast *Saccharomyces cerevisiae*
M. Motizuki, K. Mitsui, Y. Endo and K. Tsurugi 345–350

Chromatin structure and induction-dependent conformational changes of human interferon-β genes in a mouse host cell
J. Bode, H.-J. Pucher and K. Maass 393–401

Nucleotide sequence characterization of a *Drosophila* retrotransposon, *412*
S. Yuki, S. Inouye, S. Ishimaru and K. Saigo 403–410

Structure and *in vitro* transcription of tRNA gene clusters containing the primers of MuLV reverse transcriptase
T. Russo, F. Costanzo, A. Oliva, R. Ammendola, A. Duilio, F. Esposito and F. Cimino 437–442

Biosynthesis and intracellular processing of carbonic anhydrase in *Chlamydomonas reinhardtii*
T. Toguri, S. Muto and S. Miyachi 443–450

The effect of the inverted repeat structure on the production of the cloned *Bacillus amyloliquefaciens* α-amylase
P. Kallio 491–495

Isolation and characterization of a 2.2-kb operon preceding the α-amylase gene of *Bacillus amyloliquefaciens*
P. Kallio, I. Ulmanen and I. Palva 497–504

A transcription terminator in the 5′ non-coding region of the tyrosyl tRNA synthetase gene from *Bacillus stearothermophilus*
M. M. Y. Waye and G. Winter 505–510

Intracellular transport and tyrosine sulfation of procollagens V
L. I. Fessler, S. Chapin, S. Brosh and J. H. Fessler 511–518

Tissue-specific and light-dependent changes of chromatin organization in barley (*Hordeum vulgare*)
K. Steinmüller, A. Batschauer and K. Apel 519–525

Visualization of intermediary transcription states in the complex between *Escherichia coli* DNA-dependent RNA polymerases and a promoter-carrying DNA fragment using the gel retardation method
H. Heumann, W. Metzger and M. Niehörster 575–579

Protein chemistry and structure

Binding of gossypol to purified tubulin and inhibition of its assembly into microtubules
F. J. Medrano and J. M. Andreu 63– 69

The isolation, purification and amino-acid sequence of insulin from the teleost fish *Cottus scorpius* (daddy sculpin)
J. F. Cutfield, S. M. Cutfield, A. Carne, S. O. Emdin and S. Falkmer 117–123

Proteolytic fragmentation of brain myosin and localisation of the heavy-chain phosphorylation site
B. Barylko, P. Tooth and J. Kendrick-Jones 271–282

Molecular conformation of gonadoliberin using two-dimensional NMR spectroscopy
K. V. R. Chary, S. Srivastava, R. V. Hosur, K. B. Roy and G. Govil 323–332

Rainbow trout protamines – Amino acid sequences of six distinct proteins from a single testis
D. J. McKay, B. S. Renaux and G. H. Dixon 361–366

Analogy between fibrinogen and casein – Effect of an undecapeptide isolated from κ-casein on platelet function
P. Jollès, S. Lévy-Toledano, A.-M. Fiat, C. Soria, D. Gillessen, A. Thomaidis, F. W. Dunn and J. P. Caen 379–382

Reduction of lactoperoxidase by the dithionite anion monomer
P.-I. Ohlsson, J. Blanck and K. Ruckpaul 451–454

Pectinesterase – The primary structure of the tomato enzyme
O. Markovič and H. Jörnvall 455–462

^{1}H-NMR assignment and secondary structure of a *Herpes simplex* virus glycoprotein D-1 antigenic domain
M. P. Williamson, M. J. Hall and B. K. Handa 527–536

Enzymology

Biochemical comparison of the *Neurospora crassa* wild-type and the temperature-sensitive leucine-auxotroph mutant *leu-5* – Detailed kinetic comparison of the leucyl-tRNA synthetases
R. K. Airas, J. Schischkoff and F. Cramer 51– 56

Steroid sulfatase – Biosynthesis and processing in normal and mutant fibroblasts
J. Conary, A. Nauerth, G. Burns, A. Hasilik and K. von Figura 71– 76

Purification and characterization of *Bacillus coagulans* oligo-1,6-glucosidase
Y. Suzuki and Y. Tomura 77– 83

Phosphorylase kinase from chicken skeletal muscle – Quaternary structure, regulatory properties and partial proteolysis
I. E. Andreeva, N. B. Livanova, T. B. Eronina, G. V. Silonova and B. F. Poglazov 99–106

Characterization of functional domains in human tissue-type plasminogen activator with the use of monoclonal antibodies
P. Holvoet, H. R. Lijnen and D. Collen 173–177

Mechanisms of lipid peroxidation dependent upon cytochrome P-450 LM_2
G. Ekström and M. Ingelman-Sundberg 195–201

Binding of nucleotides to nucleoside diphosphate kinase monitored by rose Bengal
I. Lascu, E. Presecan and I. Proinov 239–243

Purification, molecular and enzymic characterization of an acid RNase from the insect *Ceratitis capitata*
J. M. García-Segura, M. M. Orozco, J. M. Fominaya and J. G. Gavilanes 367–372

The role of binding subsite A in reactions catalyzed by hen egg-white lysozyme
T. Fukamizo, K. Hayashi and S. Goto 463–467

Purification and characterization of *N,N*-dimethylformamidase from *Pseudomonas DMF 3/3*
H.-P. Schär, W. Holzmann, G. M. Ramos Tombo and O. Ghisalba 469–475

Monoclonal antibodies inhibitory to human plasmin – Definitive demonstration of a role for plasmin in activating the proenzyme of urokinase-type plasminogen activator
P.-S. Sim, D. R. H. Fayle, W. F. Doe and R. W. Stephens 537–542

Brain pyridoxal kinase – Purification and characterization
J. A. Kerry, M. Rohde and F. Kwok 581–585

The M_r-50000 polypeptide of mammalian pyruvate dehydrogenase complex participates in the acetylation reactions
O. G. L. De Marcucci, J. A. Hodgson and J. G. Lindsay 587–594

Lipoic acid is the site of substrate-dependent acetylation of component X in ox heart pyruvate dehydrogenase multienzyme complex
J. A. Hodgson, O. G. De Marcucci and J. G. Lindsay 595–600

Hydrolysis of *p*-nitrophenyl acetate by the peptide chain fragment (336–449) of porcine pancreatic lipase
J. D. De Caro, P. Rouimi and M. Rovery 601–607

The role of compound III in reversible and irreversible inactivation of lactoperoxidase
M. Huwiler, H. Jenzer and H. Kohler 609–614

Purification, subunit composition and regulatory properties of the ATP · Mg^{2+}-dependent form of type I phosphoprotein phosphatase from bovine heart
D. J. Price, D. Tabarini and H.-C. Li 635–645

Carbohydrates, lipids and other natural products

Ricin-resistant mutants of baby-hamster-kidney cells deficient in α-mannosidase-II-catalyzed processing of asparagine-linked oligosaccharides
R. C. Hughes and J. Feeney 227–237

Primary structure of a new tetraantennary glycan of the *N*-acetyllactosaminic type isolated from human factor VIII/von Willebrand factor
B. Samor, J.-C. Michalski, H. Debray, C. Mazurier, M. Goudemand, H. Van Halbeek, J. F. G. Vliegenthart and J. Montreuil 295–298

Chitin biosynthesis by a fungal membrane preparation – Evidence for a transient non-crystalline state of chitin
C. A. Vermeulen and J. G. H. Wessels 411–415

The major human urinary trypsin inhibitor is a proteoglycan
M. Balduyck, C. Mizon, H. Loutfi, C. Richet, P. Roussel and J. Mizon 417–422

Physical biochemistry

Polysaccharide from coccoliths ($CaCO_3$ biomineral) – Influence on crystallization of calcium oxalate monohydrate
D. J. Kok, L. J. M. J. Blomen, P. Westbroek and O. L. M. Bijvoet 167–172

Calcium binding to bone γ-carboxyglutamic acid protein from calf studied by ^{43}Ca NMR
M. Svärd, T. Drakenberg, T. Andersson and P. Fernlund 373–378

Oscillating dissipative structures in mitochondrial suspensions
E. L. Holmuhamedov 543–546

The resolution of heterogeneous fluorescence of multitryptophan-containing proteins studied by a fluorescence-quenching method
W. Stryjewski and Z. Wasylewski 547–553

Membranes and bioenergetics

The relationship between light-induced increases in the H^+ conductivity of thylakoid membranes and activity of the coupling factor
R. Hangarter and D. R. Ort 7– 12

Fc_γ-receptor-mediated changes in the plasma membrane potential induce prostaglandin release from human fibroblasts
J. Frey, M. Janes, W. Engelhardt, E.-G. Afting, C. Geerds and B. Möller 85– 89

Processing of follitropin and its receptor by cultured pig Sertoli cells – Effect of monensin
J. M. Saez and C. Jaillard 91– 97

Insulin receptors of chicken liver and brain – Characterization of α and β subunit properties
J. Simon and D. Leroith 125–132

Calorimetric and infrared spectroscopic studies of the interaction of α-tocopherol and α-tocopheryl acetate with phospholipid vesicles
J. Villalain, F. J. Aranda and J. C. Gómez-Fernández 141–147

Orthophosphate – pyrophosphate exchange catalyzed by soluble and membrane-bound inorganic pyrophosphatases – Role of H^+ gradient
L. De Meis, M. I. Behrens, H. Celis, I. Romero, M. T. Gómez Puyou and A. Gómez Puyou 149–157

Antibodies to the ATP-binding site of the human epidermal growth factor (EGF) receptor as specific inhibitors of EGF-stimulated protein-tyrosine kinase activity
W. J. Gullick, J. Downward, J. G. Foulkes and M. D. Waterfield 245–253

Determination of the upper and lower limits of the mechanistic stoichiometry of incompletely coupled fluxes – Stoichiometry of incompletely coupled reactions
A. D. Beavis and A. L. Lehninger 307–314

The upper and lower limits of the mechanistic stoichiometry of mitochondrial oxidative phosphorylation – Stoichiometry of oxidative phosphorylation
A. D. Beavis and A. L. Lehninger 315–322

Limited proteolysis of lactose permease from *Escherichia coli*
U. Stochaj, B. Bieseler and R. Ehring 423–428

The respiratory nitrate reductase from *Paracoccus denitrificans* – Molecular characterisation and kinetic properties
A. Craske and S. J. Ferguson 429–436

Isolation and characterization of the 10-kDa and 22-kDa polypeptides of higher plant photosystem 2
U. Ljungberg, H.-E. Åkerlund and B. Andersson 477–482

Estimation of inter-binding-site distances in sarcoplasmic reticulum (Ca^{2+} + Mg^{2+})-ATPase using Eu(III) luminescence energy transfer
T. R. Herrmann, P. Gangola and A. E. Shamoo 555–560

Peptide uptake by *Salmonella typhimurium* – The periplasmic oligopeptide-binding protein
I. D. Hiles and C. F. Higgins 561–567

Dimeric ubiquinol:cytochrome *c* reductase of *Neurospora* mitochondria contains one cooperative ubiquinone-reduction centre
P. Linke, G. Bechmann, A. Gothe and H. Weiss 615–621

Nucleotide sequence of the *pntA* and *pntB* genes encoding the pyridine nucleotide transhydrogenase of *Escherichia coli*
D. M. Clarke, T. W. Loo, S. Gillam and P. D. Bragg 647–653

Cellular biochemistry and metabolism

Control of urea production, glutamine release and ammonia uptake in the perfused rat liver by the sympathetic innervation
C. Ballé and K. Jungermann 13– 18

Control of ketogenesis in the perfused rat liver by the sympathetic innervation
U. Beuers, K. Beckh and K. Jungermann 19– 24

Theoretical analysis of the flux control properties of a substrate cycle
A. Sorribas and R. Bartrons 107–115

Glycosylation and secretion of acid phosphatase in *Schizosaccharomyces pombe*
A.-M. Schweingruber, F. Schoenholzer, L. Keller, R. Schwaninger, H. Trachsel and M. E. Schweingruber 133–140

Synaptosomal bioenergetics – The role of glycolysis, pyruvate oxidation and responses to hypoglycaemia
R. A. Kauppinen and D. G. Nicholls 159–165

Demonstration of cGMP-dependent protein kinase and cGMP-dependent phosphorylation in cell-free extracts of platelets
R. Waldmann, S. Bauer, C. Göbel, F. Hofmann, K. H. Jakobs and U. Walter 203–210

Identification and characterization of the 35-kDa β subunit of guanine-nucleotide-binding proteins by an antiserum raised against transducin
W. Rosenthal, D. Koesling, U. Rudolph, C. Kleuss, M. Pallast, M. Yajima and G. Schultz 255–263

Control of ammonia distribution ratio across the liver cell membrane and of ureogenesis by extracellular pH
C. Rémésy, C. Demigné and P. Fafournoux 283–288

A ^1H-NMR study of the activity expressed by lactate dehydrogenase in the human erythrocyte
K. M. Brindle, I. D. Campbell and R. J. Simpson 299–305

Stimulation of DNA synthesis in quiescent rabbit chondrocytes in culture by limited exposure to somatomedin-like growth factors
Y. Hiraki, Y. Kato, H. Inoue and F. Suzuki 333–337

Transport and processing of endocytosed lysosomal α-glucosidase in cultured human skin fibroblasts
R. P. J. Oude Elferink, J. Van Doorn-Van Wakeren, T. Hendriks, A. Strijland and J. M. Tager 339–344

Heparan sulfate proteoglycans of human lung fibroblasts – Occurrence of distinct membrane, matrix and secreted forms
V. Lories, G. David, J.-J. Cassiman and H. Van den Berghe 351–360

Immunological detection of proteins phosphorylated at tyrosine in cells stimulated by growth factors or transformed by retroviral-oncogene-coded tyrosine kinases
M. F. Di Renzo, R. Ferracini, L. Naldini, S. Giordano and P. M. Comoglio 383–391

Activation *in vitro* of respiratory nitrate reductase of *Escherichia coli* K12 grown in the presence of tungstate – Involvement of molybdenum cofactor
L. Saracino, M. Violet, D. H. Boxer and G. Giordano 483–490

Internalization of low-density lipoprotein-specific receptors in leukemic guinea pig lymphocytes
J. Sainte-Marie, M. Vidal, J. R. Philippot and A. Bienvenue 569–574

The heat-shock response in *Drosophila* KC 161 cells – mRNA competition is the main explanation for reduction of normal protein synthesis
R. J. Jackson 623–634

The position of the oligosaccharide side-chains of phytohemagglutinin and their accessibility to glycosidases determines their subsequent processing in the Golgi
L. Faye, A. Sturm, R. Bollini, A. Vitale and M. J. Chrispeels 655–661

Anomeric specificity of D-glucose metabolism in rat adipocytes
F. Malaisse-Lagae and W. J. Malaisse 663–666

Developmental biochemistry and immunology

Demonstration of membrane receptors for human natural and recombinant ^{125}I-labeled tumor necrosis factor on HeLa cell clones and their role in tumor cell sensitivity
V. Lehmann and W. Dröge 1– 5

Sulphation and the vegetative growth of *Dictyostelium discoideum*
S. J. Davis and J. F. Wheldrake 179–185

Indexed in *Current Contents*
